

### INVENTOR/FIRM CORRECTIONS

The present application was filed by the undersigned as a National Phase application on January 14, 2005. Formal documents were incorrectly submitted on February 24, 2005 by another law firm, Ladas & Parry LLP, under the present application number (10/522,210) instead of their correct application number (10/522,110), and thus the inventor's name and firm representation information were noted inaccurately on the original Filing Receipt and Notice of Acceptance dated January 13, 2006 and reflecting an acceptance date of February 24, 2005. Ladas & Perry notified the Patent Office of the error by letter on January 27, 2006 (copies of noted documents are enclosed herewith).

Meanwhile, Applicant received a Notification of Missing Requirements for this matter dated November 28, 2005 reflecting the correct inventor and firm information, and subsequently submitted a response thereto on January 27, 2006. Applicant received a corrected Filing Receipt dated July 31, 2006, reflecting the accurate inventor and firm representation information. The acceptance date of February 24, 2005 appears to have been based on the incorrect filing by Ladas & Parry, and Applicant wishes to confirm that that date should be used henceforth as the correct filing date for this application.

But Applicant is therefore at a loss as to why the Office Action dated June 27, 2006 still shows the address of the Ladas & Parry firm and the incorrect inventor. Applicant thus wishes to confirm with the Examiner that the inventor's name for the present application is "Hervé Riu," and that the

undersigned should be on record as the correct contact for prosecution of this matter. A copy of the Declaration and Power of Attorney is attached for the Examiner's reference.

Applicant is also at a loss as to why the present application was published with the incorrect inventor and firm representation information, as US 2006/0094547 A1 on May 4, 2006 (copy enclosed). Applicant requests that the application be re-published reflecting the correct inventor and firm information.
